

## Ence closes sales of 100% of its pulp production by 2017

- The sales agreements represent a volume of sales of more than 975,000 tons in the year.
- The company ensures from the beginning of the year the placement of 100% of its production, surpassing that of the previous year.

**January 13, 2017.-** Ence – Energía y Celulosa has managed to close cellulose sales agreements for the current year for a volume of 975,100 tonnes.

In this way, the company ensures from the beginning of the year the placement of 100% of its production, surpassing that of the previous year.

It should be noted that almost all of the sales agreements reached are destined to Europe, the market with the highest sales margins: tissue and specialties. Within the set of agreements, stands out as the main destination of sales Germany, with 250,000 tons, followed by the Iberian Peninsula with 200,000 tons.
